LOOKING FOR A NEW JOB?

In today's economy, more people are looking for work. One way is to post your resume online, but take care. Identity thieves use these sites to steal information. These tips can help minimize your risk. Use only sites that protect your personal data. Casual browsers should not see your full name, address, etc. If a potential employer is interested, they should get personal information only by request from you. If you do receive a job offer, be cautious if it seems too good to be true. It may be a ploy to get your information. If you receive an email that asks for money, or for your Social Security number, ignore it. Also, be sure you have the ability to delete your resume and other information once you have completed your job search.

GET ENOUGH SLEEP

Recent studies show that there may be a link between poor sleep and weight gain. If you have sleep shortfalls, you experience an increase in hunger hormones that could lead you to overeat during the day. Fatigue also makes you less likely to get enough exercise. Both adults and children can be affected by poor sleep. Practicing healthy sleep habits can have a good effect on overall health.

HAVE YOU LAUGHED TODAY?

Researchers have found that laughter might just be the best medicine. Laughing reduces stress, lowers blood pressure, and boosts your immune system. It can even improve relationships. Take some moments each day to look at the lighter side of things and your mood and health will benefit.

Character is like a tree and reputation like a shadow. The shadow is what we think of it; the tree is the real thing. —Abraham Lincoln
